

300Mbps Wireless 4G LTE Outdoor PoE Router

WI-LTE117-O
Hardware Version: V2

Overview

Supporting 802.3af PoE Output, WI-LTE117-O is an outdoor 4G LTE wireless router with download speed of up to 150Mbps. It allows you to share your 4G LTE network anywhere and anytime with multiple Wi-Fi devices so you can enjoy uninterrupted network service. WI-LTE117-O is suitable for monitoring scenarios such as rural areas, ranches, and scenic spots where it is inconvenient to install broadband. 3G/4G, and WAN fail-over backup strategy ensures WI-LTE117-O provides a sustained internet connection. Besides, it also support cloud platform management, which makes it easier for users to manage devices.

Features

High-Speed 4G Network

Using LTE CAT4 technology, WI-LTE117-O delivers maximum speeds up to 150Mbps, which brings smooth online experience such as enjoying uninterrupted HD movies, rapid file downloads and smooth video chats.

Easy-To-Use

With an integrated 4G LTE modem and a built-in SIM card slot, WI-LTE117-O can work normally after users insert a SIM card and power on the 4G device, eliminating complicated setup and saving more time cost to users.

Fail-over and Network Backup

Fail-over deliver redundant connectivity to ensure uptime, whether your primary connection is wired or cellular. If the primary connection fails, the backup kicks in.

Multiple Power Supply Methods and PoE Output

WI-LTE117-O supports 802.3at PoE IN and 48-54V DC IN, which provides flexible power options for different environment layout. Besides, it provides PoE output ports which can deliver power to the camera or other powered devices directly.

Unmatched Convenience To Improve Productivity

With the ability to quickly establish powerful wireless networks, WI-LTE117-O delivers great convenience, which makes it an idea solution for multiple scenarios such as at home, office and in remote location. Just plug it in anywhere you want to boost on-site productivity and stay connected in a diverse range of

Cloud Management

Wi-Tek Cloud's quick installation and configuration provide reliable performance, visual management and remote access, which is easy to operate and maintain.
