Boost PoE Injector

WI-POE62-24V | WI-POE62-48V

Overview

Wi-Tek Boost PoE Injector is designed to address the PoE power supply needs of low-voltage environments, ensuring that the equipment can provide stable PoE output even at lower supply voltages. It provides 1 10/100/1000Mbps RJ45 input port and 1 10/100/1000Mbps PoE output port. No configuration, plug and play. It can provide power and transmit data for IPCameras, IP phones, wireless APs, and other PD devices.

Features

9-42V DC input*

This device supports 9-42V DC input, ensuring stable and reliable PoE output even under low voltage power supply.

*Note: Refers to WI-POE62-48V DC input range, WI-POE62-24V DC input please see the specification sheet on the next page.

Save wiring and construction time

A single Ethernet cable can handle power supply and data transmission, eliminating the need for separate power lines and saving construction time.

Supports Desktop or Wall Mount

Wi-Tek Boost PoE Injector are suitable for use on a desktop or in a wall-mount installation and meet your different installation environments.

Easy to Install

No configuration required, simply connect the injector to an Ethernet switch and PoE device to provide power and data transmission.
